

Why We Are Requesting This Information

L.E.A.D. requests demographic percentage data because many grants require detailed information about the populations we serve. Providing accurate demographic breakdowns allows us to:

- **Demonstrate community needs** and show that our programs reach the intended student groups.
- **Meet eligibility and reporting requirements** set by grant funders.
- **Strengthen our applications** by showing measurable data about who benefits from our services.
- **Ensure equitable distribution of resources** based on the demographics of our student population.

This information helps us secure funding that directly supports programs, services, and opportunities for students.

	School Information					Demographic Composition of the Student Body (in %)						
Grade Level	School Name	Street Address	Town	State	Zip Code	# Students	Male/Female	White	Hispanic	Asian	Black	Other

Please Complete Below:

Officer's Base Salary:

Anticipated Total Hours Taught by All Instructors in Classroom¹:

¹ **Example Calculation:** If an officer teaches one class **per week** for **50 minutes** over a **10-week period**:

1 session per week × 10 weeks = **10 sessions**

- 10 sessions × 50 minutes each = **500 minutes total**
- 500 minutes ÷ 60 = **8.33 hours**
